

Six Data Storage and Management Challenges (and How To Solve Them)

e-book

Introduction

Can your IT infrastructure team keep up with the demands of a distributed workforce and data hungry applications? If you are overwhelmed by maintenance tasks and struggling to deliver IT projects fast enough, because you're continually challenged to be agile and "do more with less," it's time to rethink how you manage data storage.

Maximize Your Data Infrastructure Advantage

To get performance and agility that scales, there are six data storage management challenges you will need to solve – and this e-book will show you how.

Read on for the solutions →

The Six Data Storage Management Challenges

- 1 Bridge the skills gap
- 2 Do more with less
- 3 Get more value from your data center
- 4 The need for budget efficiencies
- 5 Unpredictable business growth
- 6 The need to protect data (and your company's reputation)

Challenge 1

Bridge the Skills Gap

There are only so many hours in a workday. If you're not careful, your team will spend more and more of those hours maintaining enterprise storage systems, with less time for strategic projects or supporting change. You either need to keep hiring, or help your team find new efficiencies.

Solution

Make automation work for you. Automation and analytic tools with integrated AI artificial intelligence (AI) and machine learning (ML) help manage ever-growing storage with fewer personnel, resources and human interaction.

How To Implement It

Hitachi Ops Center uses AI-enabled IT analysis and automation to improve operational efficiency and speed of new resource delivery.

The Hitachi Vantara Advantage

- Reduce manual administrative tasks by up to 70% to give your team a break.
- Automate storage provisioning workflows to simplify and error-proof your infrastructure resource management. Optimize performance and improve the speed of delivery with insights from machine-learning resources analysis.
- Gain IT operational insights to help optimize end-to-end resource performance and improve utilization.

“

I can't bridge the skills gap nor deliver with this reduced headcount.

”

“

I am constantly challenged to deliver IT projects faster, with reduced resources, so struggle to meet my SLAs.

”

Challenge 2

Do More With Less

You can't afford to let increasing storage demands slow your business down. But you also can't afford the time and cost of setting up new enterprise storage infrastructure.

Solution

World-class storage infrastructure (speed, capacity, low latency, high availability) is now accessible for companies of all sizes and budgets. New storage virtualization capabilities even allow you to get additional value from older infrastructure without having to completely rip and replace.

How To Implement It

The Hitachi Virtual Storage Platform (VSP) family delivers the performance your growing mission-critical applications need, and consolidate to more efficiently manage and increase the utilization of your storage footprint.

The Hitachi Vantara Advantage

- Eliminate bottlenecks for data-hungry applications with NVMe.
- Maintain the pace of digital business with a 100% data availability GUARANTEED and 24/7 responsive infrastructure.
- Ensure low latency service levels are met and rapidly troubleshoot problems with telemetry metrics analysis across the full data path, from virtual machine to shared storage resources.
- Suffer fewer headaches with predictable and repeatable experiences for all your applications.
- Align infrastructure to your unique needs with the Hitachi Vantara portfolio of hybrid-flash, all-flash and NVMe arrays.

Challenge 3

Get Your Value From Your Data Center

Once routine tasks are under control, you need to keep them under control. But can your infrastructure keep up with accelerating demands and still support new digital transformation initiatives?

Solution

Future-proof your storage decisions with scalable, reliable infrastructure. Agility forms a foundation for confident business innovation.

How To Implement It

Hitachi VSP portfolio of hybrid, all-flash and NVMe storage gives you economical access to the latest technology to increase agility and drive innovation. In addition, Hitachi Ops Center provides AI-enabled operations to improve IT operational efficiencies, optimize performance and ensure your data is protected.

The Hitachi Vantara Advantage

- Get best in class performance with latency as low as 64 μ s and 5.8M IOPs for supercharged application response times.
- Quickly and easily upgrade to Storage Class Memory (SCM) and NVMe over Fabrics (NVMe-oF) in the future.
- Simplify storage management tasks with unified system administration.
- Advanced AIOps accelerate speed of execution and innovation by letting your staff concentrate on areas that add value to the business.
- Affordable, simple, trusted and scalable enterprise-grade storage infrastructure.

Don't let your infrastructure hold back your pivot towards the "Next Normal".

“

To keep up, I need to find ways to get more out of my budget.

”

Challenge 4

Create Budget Efficiencies

Your staff and infrastructure are stretched, but so is your budget. It's time to get creative about resource use to maximize ROI.

Solution

Adopt technologies that create budget efficiencies. For example, automation reduces operational personnel cost, virtualization improves the ROI of existing infrastructure, and data compression reduces infrastructure requirements.

How To Implement It

Hitachi's VSP family allows you to dynamically scale up or down as needed by applying technology solutions to improve performance efficiency.

The Hitachi Vantara Advantage

- Accelerate new resource delivery by up to 90% by using automated provisioning workflows.
- Reduce IT operating budget waste by up to 20% by paying as you consume.
- Reduce storage costs with AI-driven data reduction that is guaranteed by Hitachi.
- 4:1 sight-unseen effective capacity guarantee to extract the highest value per GB and IOP.
- Extract the highest value per GB for performance with Data Efficiency (ADR).
- Lower TCO on existing assets by up to 20% and extend the life of older systems with using third-party storage virtualization.

Challenge 5

Unpredictable Business Growth

Data demands on your business aren't completely predictable, but your business relies on consistent service. Your infrastructure needs a way to flex with demand without breaking the bank.

Solution

Shift the way you consume IT solutions and services. Align technology spending with usage and business outcomes to reduce the risk of over- or under-investing in the IT solutions that run your enterprise.

How To Implement It

Pay for what you need when you need it with EverFlex flexible consumption options for your complete solution whether that be storage and remote monitoring, a fully managed service, or storage as a Service.

The Hitachi Vantara Advantage

- Scale storage capacity up or down with demand using EverFlex Consumption for utility or 'as a Service' offerings from Hitachi Vantara and our partners.
- Utility offerings allow you to tailor secure and compliant managed services to match your business requirements – one size does not fit all!
- Guarantee IT service availability with SLAs backed by Hitachi Vantara.
- Access pay per use consumption choices with predictable, transparent pricing and guaranteed savings through EverFlex Consumption.

“

My technology needs can be unpredictable, and I need an affordable way to match our business growth, whatever it happens to be.

”

Challenge 6

Protect Data

Not all news is good news. You don't want your business to be on the front page due to long-term outage or a data breach.

Solution

Predictable performance, encryption of stored data and guaranteed availability helps protect your uptime, data and reputation.

How To Implement It

The Hitachi Virtual Storage Platform family safeguards continuous operations for key applications and provides nonstop, uninterrupted data access and zero RTO and RPO goals.

The Hitachi Vantara Advantage

- Reduce risks with new infrastructure resource deployment with automated provisioning tasks.
- Eliminate risk of theft and data leaks with FIPS 140-2 encryption and industry-leading data erasure.
- Prevent illegal access and destruction of data with hardened system access
- Simplify ongoing security compliance with KMIP agility
- In 2020, we celebrated 20 years of our pioneering 100% data availability guarantee across the entire Hitachi VSP portfolio.

“

I need to protect our data
and our company reputation.

”

Introducing the Hitachi Midsize Enterprise Portfolio

The Hitachi Virtual Storage Platform (VSP) all-flash portfolio grows with your needs with a family of storage solutions powered by a common storage operating system, user experience and AI-enabled management suite.

PROVEN

Trusted capabilities that won't break the bank

- Legendary 100% data-availability guarantee.
- Time-tested performance, availability and scalability.
- Guaranteed to reduce storage costs.

POWERFUL

AI Ops that work harder so you can work smarter

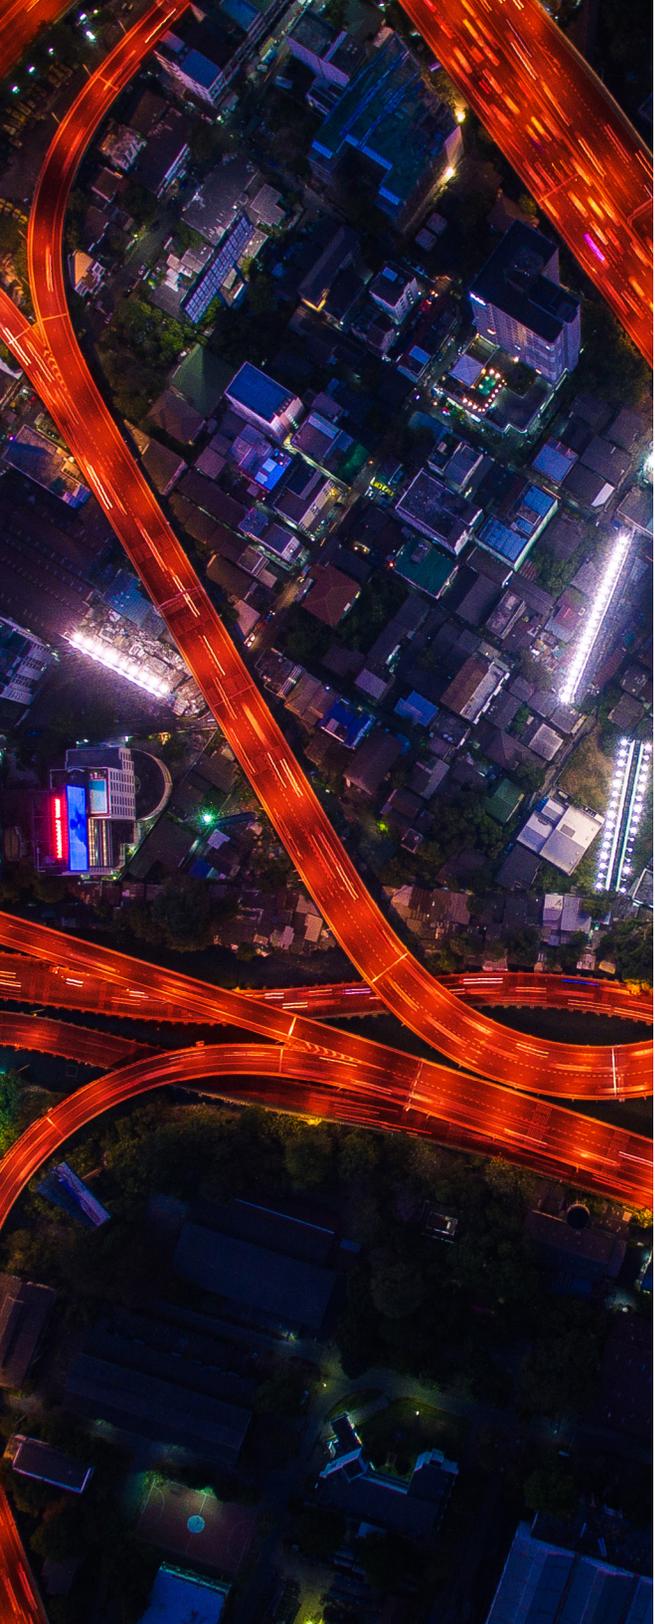

- Accelerate storage resource delivery by up to 90%
- Troubleshoot and get to root-cause analysis 4x faster.
- Reduce manual tasks by up to 70%

PREDICTABLE

Pricing that's predictable for usage that's flexible

- Predictable pricing with cloud-like consumption.
- Reduce IT operating budget waste by up to 20%
- Align purchase to business use to reduce waste, disruption and overspending.

The Hitachi Virtual Storage Platform (VSP) Midsized Enterprise Portfolio

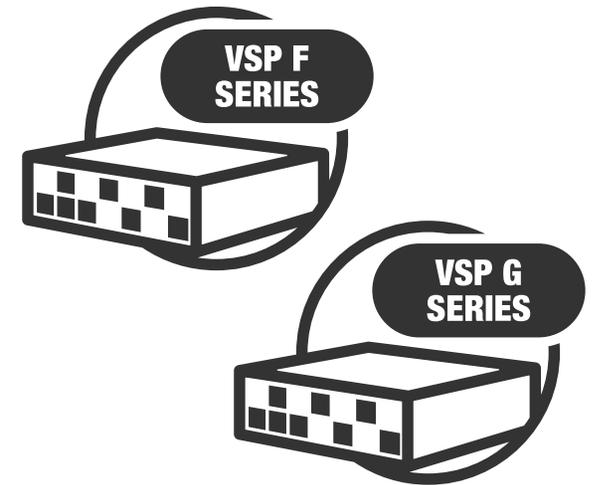

VSP E series

- Enterprise grade storage optimized for small and midsized organizations - providing best-in-class NVMe-powered performance, delivering up to 5.8M IOPS and 64 microsecond latency.

VSP F series and G series

- All-flash or hybrid-flash storage solutions with bundled software that deliver both performance and value - with up to 2.4M IOPS and 34.6 petabytes of raw flash capacity.

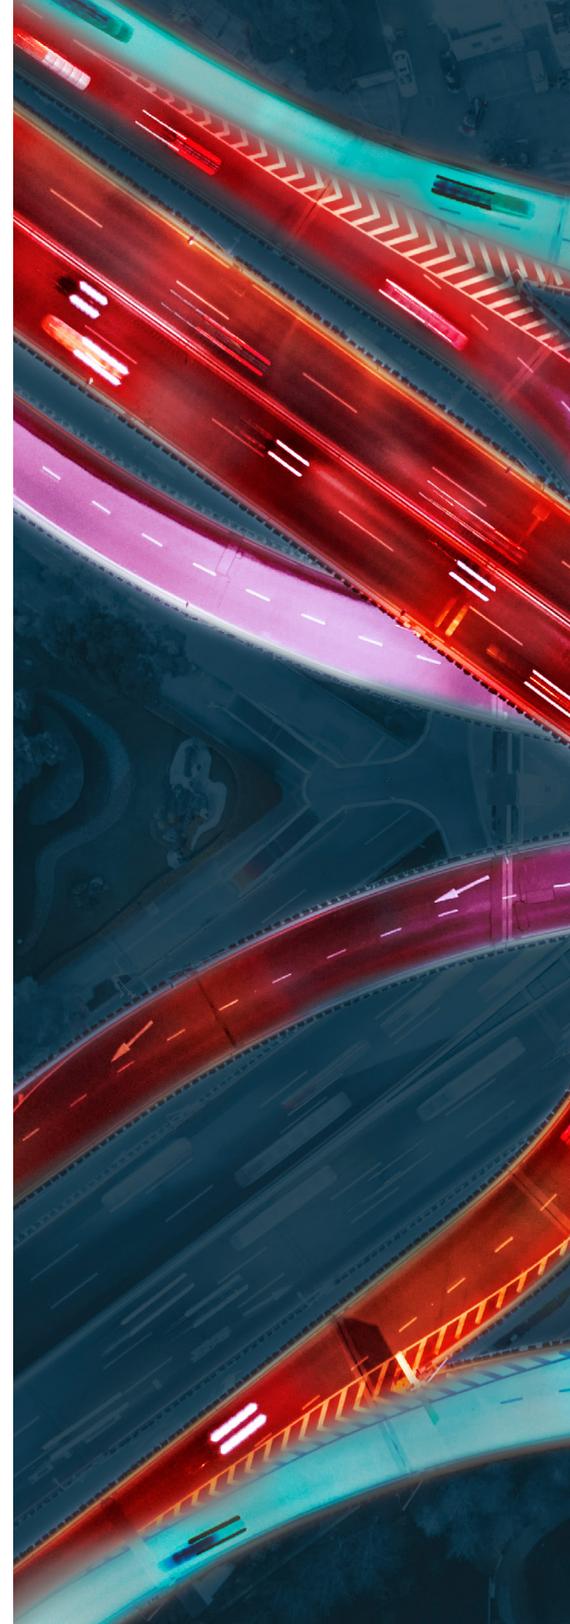

VSP 5000 series

- For the most demanding enterprise storage applications, the VSP 5000 series provides the foundation for a modern, enterprise-class infrastructure. As the world's fastest NVMe flash array, the VSP 5000 series provides 21M IOPS and 70µs best-in-class latency, an all-new, scale-out architectural design that is optimized for NVMe, and delivers best-in-class performance and resiliency.

SVOS RF

Common across all systems above

- All VSP systems ship with Hitachi Storage Virtualization Operation System (SVOS) RF, which provides a common software platform that delivers 24/7 application availability, and delivers best-in-class performance and resiliency.

Ops Center Administrator

Ops Center Analyzer

Ops Center Automator

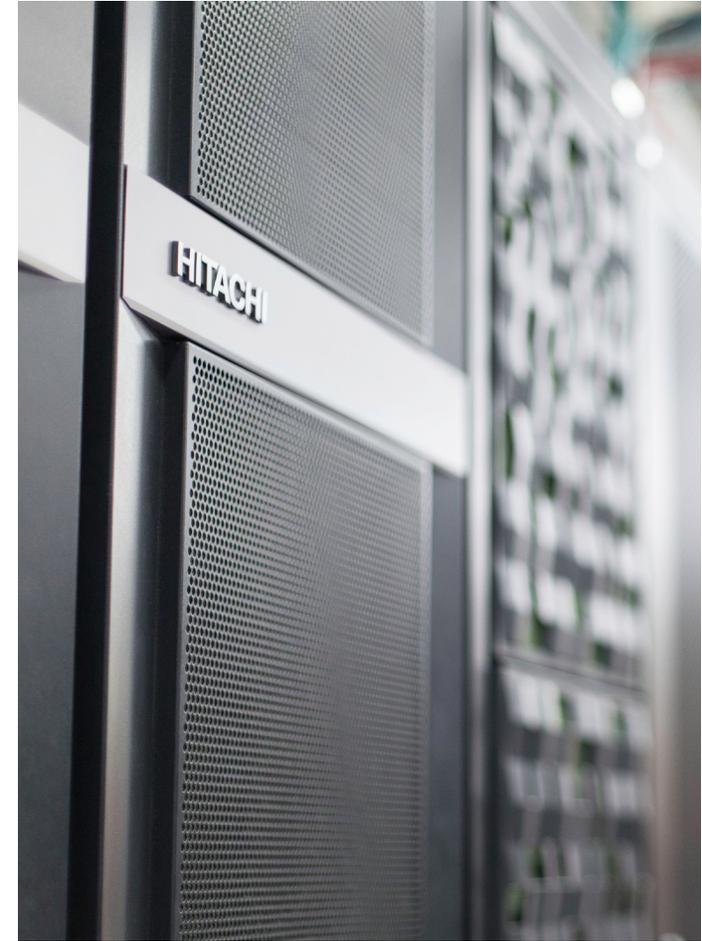

Ops Center Protector

Hitachi Ops Center

Common across all systems above

- Hitachi Ops Center management software combines key administrative and operational capabilities into an infrastructure management suite that:
 - o Can evolve as your business grows.
 - o Scales from simple, intuitive management for a single array to unified management services across data configuration, mobility and protection for larger environments.
 - o Provides global insights across data centers to improve service level delivery, resource planning, and quicker root cause analysis and automation across the full data path.
 - o Automates IT resource provisioning to speed delivery...and reduce tasks
 - o And streamlines enterprise copy data management to make sure your data is protected.

Let Hitachi Vantara and our partners help you accelerate transformation with the storage portfolio made for what's next. No matter what type of data, application or business, you can trust Hitachi Vantara comprehensive storage solutions.

We Are Hitachi Vantara

We focus on making valuable, tangible improvements in how things work because we know how important your success is. By working with you and your team to resolve today's most compelling problems and address tomorrow's most consequential questions, we can improve your business and even change society itself.
